Objective

Result-oriented Technical Documentation Engineer with over 4+ years of experience delivering high-quality Technical and user-centric documentation across Automotive, Heavy Machinery, and IT sectors. Strong expertise in structured authoring and content lifecycle management(CCMS), with a proven track record of reducing operational costs through strategic content reuse and process optimization. Experienced in designing and implementing AI-enabled documentation solutions to enhance knowledge accessibility, improve technical query resolution and user-centric technical communication. Adept at collaborating with global cross-functional teams to translate complex engineering and software concepts into scalable, high-impact documentation frameworks.

Experience

• TEREX

May 2023 - Present

Sr.Technical Engineer - Documentation

- Developed and revised Product manuals,O&M manuals, Installation manuals, User Manuals, Parts Catalogs and Technical Specifications for all diverse products of **Terex** like Rough Terrain Cranes, Pick & Carry Cranes, Crushers, Washing Systems, Shredders, Conveyors and Modular Plants.
- Supervised a team of 2 technical authors by delegating revision changes and manual updates to ensure 100% alignment with schedule and zero-defect documentation.
- Collaborated with internal teams and cross functional teams to obtain in-depth understanding of the product to translate complex concepts into concise, user-friendly content.
- Collaborated with Product Owners, SMEs, Engineering, and Manufacturing teams during NPPD and sprint planning cycles to define documentation scope, validate/verify technical content and backlog priorities.
- Developed order-specific manuals by documenting machine modifications tailored to unique customer requirements, significantly increasing end-user satisfaction.
- Ensured all documentation deliverables strictly adhere to brand guidelines, organizational tone, and business requirements while maintaining full compliance with country-specific safety standards, regulatory requirements, and industry standards
- Authored and structured content using Arbortext Editor (DITA XML) implementing content reuse strategies to reduce duplication and translation costs.
- Managed high-volume documentation updates aligned with ECN/ECO change management workflows, ensuring 100% accuracy across the documents and serial specific manuals.
- Responsible for resolving helpdesk tickets by Customer, Dealers.
- Experience in planning, estimation, and execution to achieve the timely completion of all manuals.
- Identified opportunities to reduce manual search effort through AI-assisted manual query workflows for service teams.
- Reviewed and validated parts catalog data before downstream publishing, ensuring configuration accuracy and minimizing dealer-reported defects.
- Performed EBOM/MBOM analysis to ensure accurate serviceability mapping and configuration-specific documentation across multiple product lines.
- Attending NPPD/ kick-off meetings with Program manager and milestone reviews to meets objectives and requirements with right strategy and approach.

• CYIENT

Nov 2021 - May 2023

Technical writer

CLIENT : JOHN DEERE

- Created spare parts manuals and catalogs using Arbortext Editor for authoring and PTC Parametric for illustrations.Revised Technical and maintenance manuals.
- Extracted and validated technical data from Windchill PDM, PLM, and SAP to ensure 100%

documentation accuracy and configuration integrity.

- Led Continuous Improvement (CI) tasks to enhance delivery quality and customer satisfaction.
- Resolved global dealer and end-user technical queries and catalog defects (HD Tickets).
- Reduced project costs by identifying and implementing content and CAD data reuse strategies.
- Oversaw catalogues of secondary customers which are OEM's like Class, Cummins, Liebherr.

• CYIENT

May 2021 - (6 Months)

Graduate Engineer Trainee

CLIENT: ALSTOM TRANSPORTATION

- Corrected and revised O&M Manuals (CMM/PMM) and illustrated parts catalogues.
- Trained on DITA XML, pulling product data from PDM and performing BOM Analysis.
- Performed Authoring using Arbortext editor.
- Developed illustrations using Creo and Isodraw tools while analyzing drawings.

Education

• JNTUH

2016-2020

B.Tech (Mechanical Engineering)
70%

Skills

- Authoring & CMS: Arbortext Editor, Oxygen XML Editor, DITA XML, Markdown, Confluence, Adobe InDesign, Docware (Oracle CMS), Quanos, SharePoint.
- Design & Illustration: PTC Creo Parametric, PTC Creo View, IsoDraw, Creo Illustrate, Adobe Illustrator, Photoshop, Snagit.
- PLM AND PDM TOOLS: PTC Windchill, Pulse, SAP, WPA
- Cloud & IT: AWS (EC2, S3, RDS), Git, Python (Basic), CSS, HTML.
- Power Automate, Generative AI, LLM Integration, RAG Based- Technical Content Systems, DDLC.

Achievements & Awards

- Reduced serial tagging process time from 9 hours to 1 hour (88% efficiency improvement) using Power Automate.
- Developed an AI-powered documentation assistant using Retrieval-Augmented Generation (RAG) to enable intelligent search and contextual retrieval of O&M manual content, reducing manual search effort and improving response time for technical queries.
- Appreciated for clearing 500 ECN backlog, ensuring all documentation was up-to-date with changes.

Certifications

- Generative AI (Prompt Engineering & RAG - Agentic AI) - Outskill School
- AWS Solutions Architect – Intellipaat software solutions.
