Objective

Result-oriented Technical Documentation Engineer with over **4+ years** of experience delivering high-quality Technical and user-centric documentation across Automotive, Heavy Machinery, and IT sectors. Strong expertise in structured authoring and content lifecycle management, with a proven track record of reducing operational costs through strategic content reuse and process optimization. Experienced in designing and implementing AI-enabled documentation solutions to enhance knowledge accessibility, improve technical query resolution and user-centric technical communication. Adept at collaborating with global cross-functional teams to translate complex engineering and software concepts into scalable, high-impact documentation frameworks.

Experience

• TEREX

May 2023 - Present

Senior Technical Writer

- Developed and revised Product Manuals and Illustrated Parts Catalogs for diverse products of Terex like Rough Terrain Cranes, Pick & Carry Cranes, Crushers, Washing Systems, Shredders, and Modular Plants.
- Managed a team of 2 technical authors by delegating revision changes and manual updates to ensure 100% alignment with schedule and zero-defect documentation.
- Collaborated with internal teams and cross functional teams to obtain in-depth understanding of the product.
- Collaborated with Product Owners, SMEs, Engineering, and Manufacturing teams during NPPD and sprint planning cycles to define documentation scope and backlog priorities.
- Creating advance/ Order specific manuals for better end customer satisfaction.
- Authored and structured content using Arbor text Editor (DITA XML) and Adobe InDesign, implementing content reuse strategies to reduce duplication and translation costs.
- Analyzing and Reusing content to reduce project cost and translation expenditure.
- Managed documentation updates aligned with ECO/ECN change management workflows, ensuring revision accuracy across serial-specific and legacy manuals.
- Performed EBOM/MBOM analysis to ensure accurate serviceability mapping and configuration-specific documentation across multiple product lines.
- Responsible for resolving helpdesk tickets by Customer, Dealers.
- Experience in planning, estimation, and execution to achieve the timely completion of all manuals.
- Identified opportunities to reduce manual search effort through AI-assisted manual query workflows for service teams.
- Reviewed and validated parts catalog data before downstream publishing, ensuring configuration accuracy and minimizing dealer-reported defects.
- Attending NPPD/ kick-off meetings with cross functional managers/ Program manager and milestone reviews to meets objectives and requirements with right strategy and approach.

• CYIENT

Nov 2021 - May 2023

Technical writer

CLIENT: JOHN DEERE

- Revised engine manuals and operator manuals for heavy automotive machinery and power systems.
- Created spare parts manuals and catalogs using Arbor text Editor for authoring and PTC Creo Parametric for illustrations.
- Pulled data from Windchill PDM, PLM, and SAP to support documentation accuracy.
- Analyzed Engineering Change Notifications (ECN/ECO) and design changes to update revision drafts.
- Understanding of ECN/ECM for revising and pre and post configuration of the changes.

- Responsible for solving Report cards, i.e., Query, Suggestions, Defect/Errors in parts catalogs found by Dealers as well as end users.
- Soliciting SMEs and Engineers to check serviceability parts stocks, substitutes data using WPA, QWS & SAP applications.
- Reducing project cost by analyzing reusable data and CAD data.
- Oversaw IPC, PLM & PDM for John Deere and secondary customers which are OEMs like CLASs, Cummins, Liebherr and Power systems.
- Actively worked on Continuous Improvement (CI) tasks to enhance quality delivery and customer satisfaction.

• CYIENT

May 2021 - (6 Months)

Graduate Engineer Trainee

CLIENT: ALSTOM

- Corrected and revised O&M Manuals (CMM/PMM) and illustrated parts catalogues.
- Trained on DITA XML, pulling product data from PDM and performing BOM Analysis.
- Performed Authoring using Arbor text editor.
- Comprehensive CAD support to a multi-disciplinary team of engineers.
- Developed illustrations using Catia V5 and Isodraw tools while analyzing drawings.

Education

• JNTUH

2016-2020

B.Tech (Mechanical Engineering)

70%

Skills

- **Authoring & CMS:** Arbor text Editor, Oxygen XML Editor, DITA XML, Markdown, Confluence, Adobe InDesign, Docware (Oracle CMS), Quanos, SharePoint.
- **Design & Illustration:** PTC Creo Parametric, PTC Creo View, Catia V5, IsoDraw, Creo Illustrate, Adobe Illustrator, Photoshop, Snagit.
- **PLM AND PDM TOOLS:** PTC Windchill, Pulse, SAP, WPA
- **Cloud & IT:** AWS (EC2, S3, RDS), Git, Python (Basic), CSS, HTML.
- Power Automate, Generative AI, LLM Integration, RAG Based- Technical Content Systems

Achievements & Awards

- Reduced serial tagging process time from 9 hours to 1 hour (88% efficiency improvement) using Power Automate.
- Developed an AI-powered documentation assistant using Retrieval-Augmented Generation (RAG) to enable intelligent search and contextual retrieval of O&M manual content, reducing manual search effort and improving response time for technical queries.
- Appreciated for clearing 500 ECN backlog.

Certifications

- Generative AI (Prompt Engineering & RAG - Agentic AI) - Outskill School
- AWS Solutions Architect – Intellipaat software solutions.
